

Classes under consideration:

Technology :1
Not Technology :0

Description of each category:

Technology - Any sort of device that uses or produces electricity: A/C, lights, computers, phones.

Not technology - Anything that does not use or produce electricity: reading a book, gardening, going for a hike, or creating art.

Simple Examples:

Technology:

"San Antonio's new traffic lights are really useful"

"UTSA students use Canvas to determine when assignments are due"

"You can make an appointment with a doctor by selecting an available time through the website"

"The professor can connect his slides to all of the screens in the classroom"

"I like to tell my Amazon Alexa to play music for me when I am bored."

Non-technology:

"The botanical gardens are a beautiful place to visit in San Antonio."

"I like to run to keep my body healthy."

"I live on a farm where I raise my chickens and grow some vegetables for my family to eat."

"I've been reading a book by this author named Stephen King."

"I like to play the guitar on my days off work."

Corner cases where it is hard to decide if they are technology related or not:

Technology:

"My book is being mass **printed** for distribution to all of the Barnes and Nobles in America."

"The new art exhibit features interactive installations where viewers can manipulate **light** and **sound**."

Non-technology:

"I am sending my book to be edited by my coauthor."

"My grandmother uses a **traditional loom** to weave intricate patterns into her textiles."

Classes under consideration:

Transportation System: 1

Not Transportation System: 0

Description of each category:

Transportation System - The intentional movement of people, animals, or objects from one place to another using power operated machinery (car, train, airplane, boat, subway, bus, etc.).

Can also be self-powered (bicycle, scooter)

Not Transportation System - Anything that doesn't involve the intentional movement of people, animals, or objects from one place to another using power operated machinery.

Simple examples:

Transportation System:

"The new high-speed train service between cities significantly reduces travel time."

"I prefer to commute to work by bicycle to avoid traffic congestion."

"The airline industry is investing in biofuels to reduce carbon emissions from flights."

"The cruise ship departed from the port and headed towards the Caribbean islands."

"The bus network in the city provides convenient transportation options for residents."

Not Transportation System:

"The botanical garden features a diverse collection of plants from around the world."

"I enjoy hiking in the mountains to experience the beauty of nature."

"The local library hosts regular author readings and book club meetings."

"The art museum recently unveiled a new exhibit showcasing contemporary sculptures."

"I spend my weekends volunteering at a wildlife sanctuary to help care for injured animals."

Corner Cases where it is hard to decide if they are related to a transportation system or not:

Transportation System:

"The cargo **drones deliver** medical supplies to remote villages in mountainous regions."

"The city park recently added **electric scooters** for visitors to rent and **explore the area**."

Not Transportation System:

"The **amusement park ride** simulates a thrilling journey through space, complete with immersive visuals and sound effects."

"The city hosts an annual **hot air balloon festival**, attracting enthusiasts from around the world."

Xinyue Yan, win575
Xavier Sifuentes, gxg983
Kyle Bailey, hqq229

"The new **pedestrian bridge** connects two neighborhoods, making it easier for residents to access amenities on both sides."
